

RCM Cooperative

ADR UK

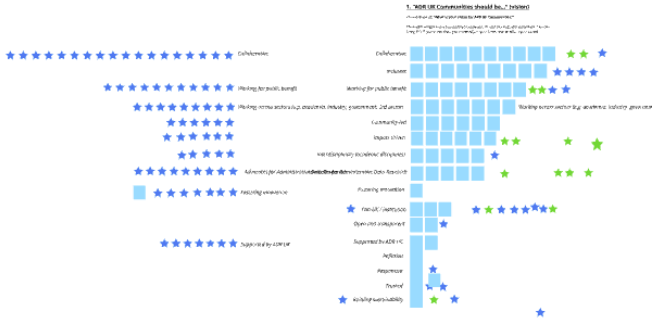

Community Leaders Workshop

Building capacity and sustainability for ADR UK Communities

1st July 2025

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

BUILDING CAPACITY IN COMMUNITY

CO-CREATION OF RECOMENDATIONS

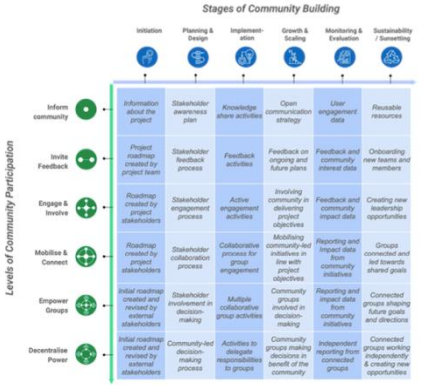

Helping you define and ADR UK understand what you want your communities to be and do

Today: Refine and operationalise

DEVELOPING COMMUNITY LEADERS

Enhancing your practical and strategic understanding of research community management (RCM)

Today: Training and planning

RCM Cooperative | ADR UK

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

MEETING PRACTICE

1. Summary of materials will be shared after the meeting (training will be recorded)
2. Breaks scheduled, and take extra as you need!
3. Be respectful – all questions are welcomed!
4. Active contribution! If you hear someone make an important point, write it down!
5. Cass will keep things moving for time!
6. Slack #adr-community-leaders to share resources etc.

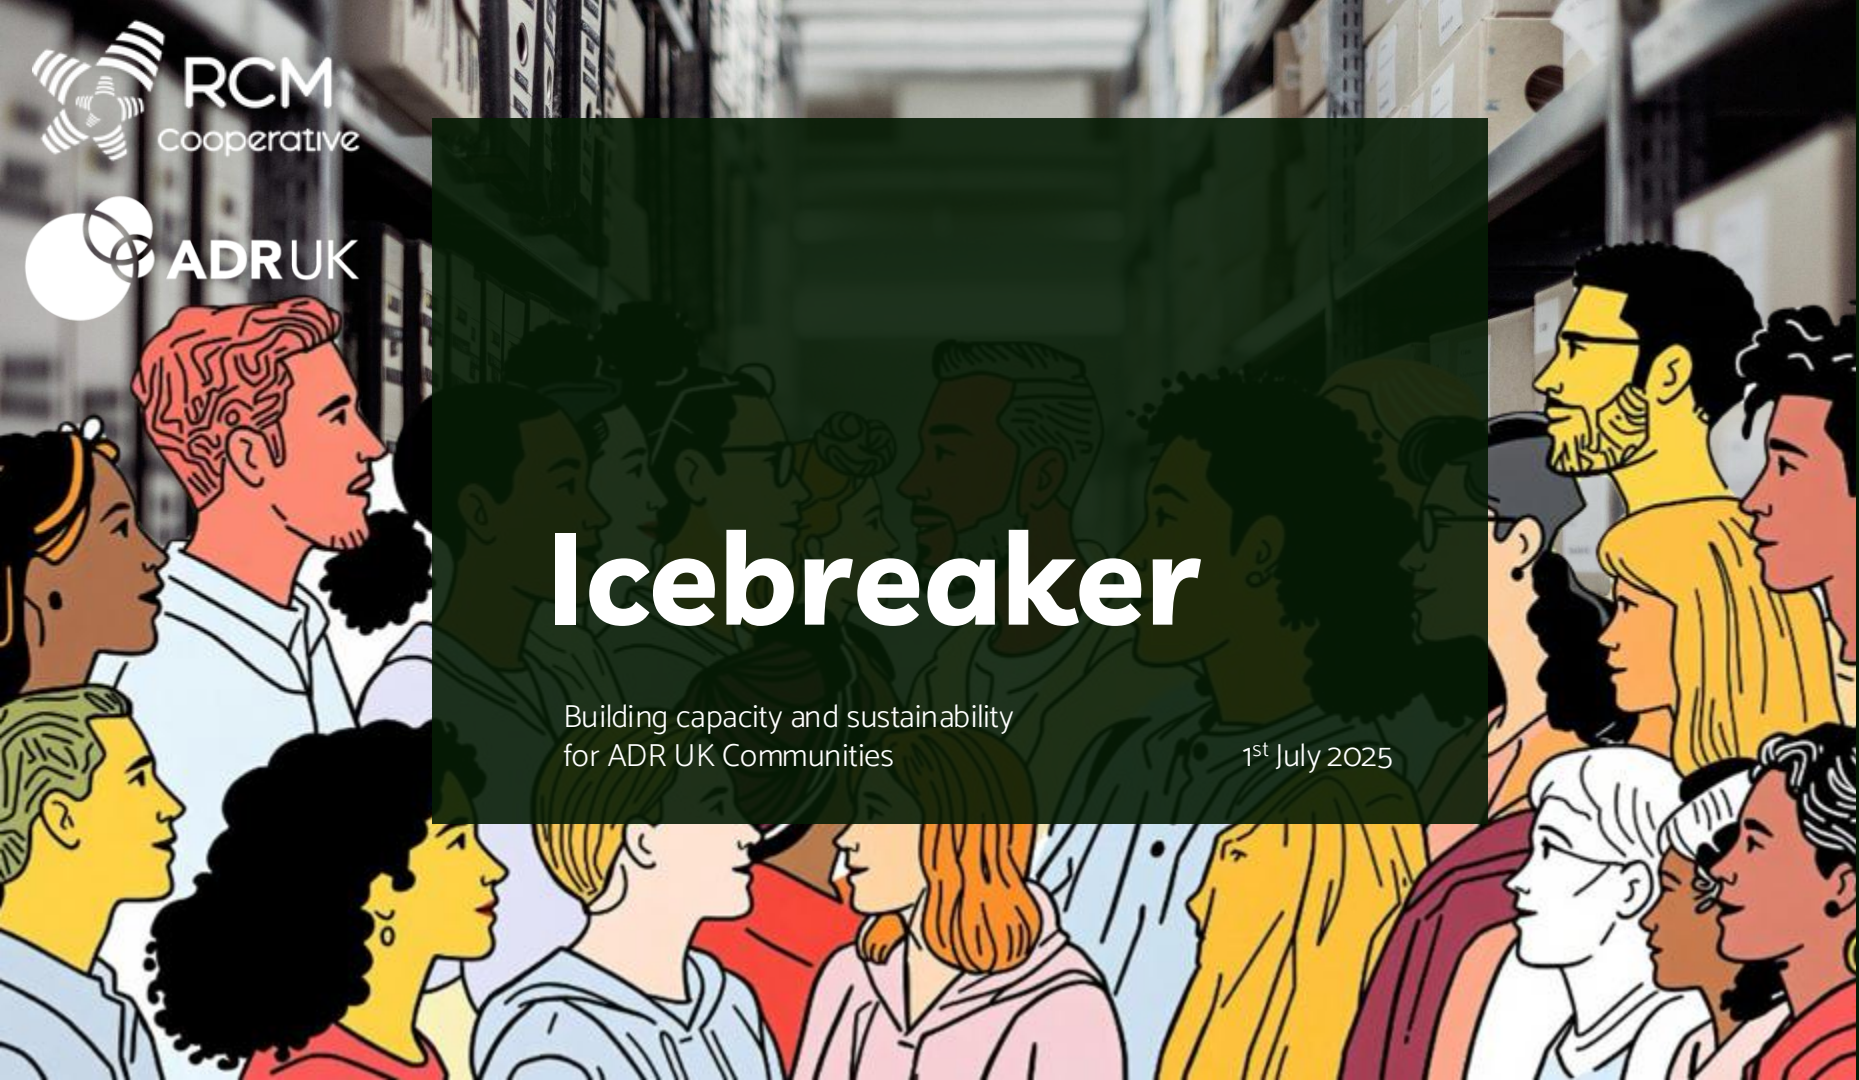

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

AGENDA

Start time	Activity
09:30	Welcome and intro
09:45	Icebreaker
10:15	Training Part 1
11:00	Break
11:15	Training Part 2
12:30	Lunch
13:15	Recap and discussion on principles for recommendation
14:00	Group co-working to define recommendations
15:00	Break
15:15	Next steps for your own community
16:00	Agreement on ongoing collaboration
16:30	Close

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

ADR UK

Developing ADR Community Recommendations

Icebreaker Questions (In-person workshop)

We will split into two lines (A and B) and face each other forming pairs.

For each of the below questions, the one person will ask the question (e.g. person A for question 1, person B for question 2) and the other person will answer.

After 2 minutes, the people in line B will move one person to the right (line A will remain where they are), forming new pairs. New pairs will ask/answer the next question.

1. **A** – What music do you like to listen too?
2. **B** – Are you a morning person or a night owl?
3. **A** – How do you like to relax after a busy day?
4. **B** – What meal/food do you enjoy sharing with others?
5. **A** – What's the most rewarding part of your work?
6. **B** – What's the least rewarding part of your work?
7. **A** – What makes it easy for you to connect with others?
8. **B** – When have you felt welcomed into a space?
9. **A** – What makes you feel like you belong in a space?
10. **B** – What does empowerment mean to you?
11. **A** – What is the greatest challenge to the success of your work?
12. **B** – What helps you trust others?

Building capacity and sustainability
for ADR UK Communities

1st July 2025

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

“An ecosystem where…”:

AI drives the economic growth on which the prosperity of our people and the performance of our public services depend

AI directly benefits people by improving health care and education and how they interact with their government

Increasing of prevalence of AI in people’s lives opens up new opportunities

1.1 Building sufficient, secure and sustainable AI Infrastructure

1.2 Unlocking data assets in the public and private sector

1.3 Training, attracting and retaining the next generation of AI scientists and founders

1.3 Enabling safe and trusted AI development and adoption through regulation, safety and assurance

RESEARCH AND AI FOR PUBLIC BENEFIT

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

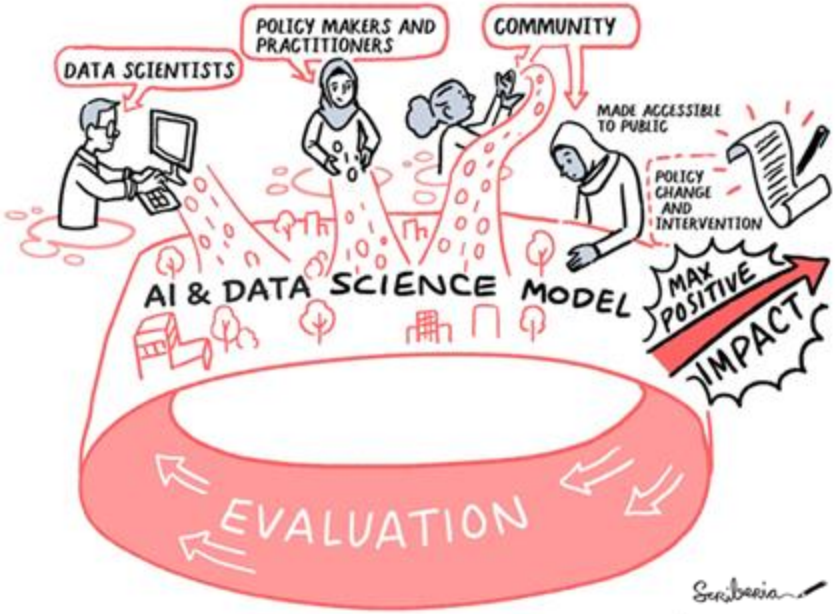

RCM Cooperative ADRUK

RESEARCH AND AI FOR PUBLIC BENEFIT

Development should be driven by the needs of people / community

All stakeholders should be involved

- Domain experts
- Users / Contributors
- Data Scientists
- Patients/Public Representatives
- Policy makers
- And many more

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

RESEARCH AND AI FOR PUBLIC BENEFIT

What does it take to drive research and AI forward?

- To collaborate?
- To co-create?
- To address societal needs?
- To innovate responsibly?
- To scale the impact?
- To benefit all stakeholders?

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

RCM Cooperative

ADRUK

Diversifying Professional Roles enables:

- Building diverse teams of specialist and generalists with range of expertise
- Embedding technical AND socio-technical considerations for robust research systems across all stages
- Providing ideal environment for collaboration and engagement with the broader community
- Examples:
    - Research Project Mangers
    - Research Software Engineers
    - Data Stewards
    - Research Community Managers

RESEARCH AND AI FOR PUBLIC BENEFIT

Communities we've managed

About AIM and RSF

Developing data standards, best practice and community around AI for multiple long term conditions research

Open Research at the Oxford Centre for Integrative Neuroimaging (OxCIN)

Find out how to share your research outputs effectively and responsibly, for improved impact, access and collaboration

The Alan Turing Institute – Roche strategic partnership

Generating insights into disease, patient, and outcome heterogeneity using advanced analytics

Professionalising traditional and infrastructure research roles in data science

Making diverse data science roles more visible and informing policymakers of the future skills needs in data science careers.

Clinical AI

How can AI be usefully deployed to provide clinical benefits?

Driving the adoption of Artificial Intelligence and machine learning in sectors of the UK economy with a high potential for growth

About BridgeAI

Data safe havens in the cloud

Developing a policy and process framework for secure environments for productive data science research projects at scale

Modelling and high-precision forecasting of complex environmental systems to make leaps in weather prediction and sustainable energy

Environment and sustainability

Data Centric Engineering (DCE) 1.0

The Alan Turing Institute partnered with Lloyd's Register Foundation to address new challenges in data-centric engineering.

Data/Culture: Building sustainable communities around Arts and Humanities datasets and tools

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

The Turing Way: Global Community Project

An open science project and community-driven project on data science and research practices.

- *300+ chapters;*
- *500+ co-authors;*
- *6000+ monthly users,*
- *collaboration with 50+ organisations;*
- *citations in peer reviewed papers, reports, policies and articles;*
- *two awards;*
- *influenced and inspired many resources & community projects.*

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

AIMS FOR THIS TRAINING

1. Understand what RCM is
2. Understand what skills are needed for RCM
3. Understand what can be achieved in a community
4. Think strategically about your stakeholders

Professionalising Community Management Roles in Interdisciplinary Research Projects

Malvika Sharan, Emma Karoune, Vicky Hellon, Cassandra Gould van Praag, Gabin Kayumbi, Arielle Bennett, Alexandra Araujo Alvarez, Anne Lee Steele, Sophia Batchelor, Arron Lacey, Kirstie Whitaker

In this article we discuss community management in interdisciplinary research teams, focusing on recognising and professionalising roles referred to here as the Research Community Managers (RCM). Drawing insights and examples from research and data science projects, we discuss how RCM roles address some of the researchâ€™s most pressing challenges, from promoting best practices for open research and reproducibility to engaging diverse stakeholders in community-led research and ensuring fair recognition for their contributions. We offer a Community Maturation Indicator and share examples of projects from The Alan Turing Institute, the UK's national institute for data science and Artificial Intelligence (AI), where institutionally supported RCM roles were established.

With the aim to integrate RCM expertise in teams involved in data science and AI research, we provide an RCM Skills and Competencies Framework. We also propose a roadmap for professionalising RCM roles by improving recognition and rewards, potential career paths and organisational support structures. To systematically sustain and progress these roles, we recommend institutional investment in establishing RCM teams that are empowered to prioritise collaboration, transparency and community-based approaches in interdisciplinary projects, such as in data science and AI. As a team, RCMs are well placed to connect disparate teams, initiatives and resources across the organisation, building more resilient research communities that can achieve greater innovation, improved project outcomes and a strongly connected ecosystem, with impacts extending beyond their narrow contexts.

Consider a community you think needs managing throughout the exercises!

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

WHAT IS RCM?

Our definition:

RCMs foster a collaborative environment where a diverse community can access the socio-technical infrastructure and participatory processes they need to actively engage, gain recognition and build shared agency over their work.

RCMs bring experience in research and data science and embed community interests while working in the interface of leadership, project management, data science team and wider community.

RCM Cooperative ADRUK

👋 What is the purpose of community?

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

PURPOSE OF COMMUNITY

A market tool

- Creating a loyal customer base
- Feeling connected to the brand
- Boost product adoption and brand loyalty

Community consumes the brand and advocates for it

A collaborative ecosystem

- Emphasizes innovation and problem-solving
- Contributing to each others success
- Platform for co-creation, feedback, and open exchange

Community shapes the offering itself

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

RCM Cooperative ADRUK

COMMUNITY AS A MARKET TOOL

“Build it and they will come”

Communication

- Participation guidelines and process
- Content development
- Technical documentation
- Open communication
- Community documentation
- Resource curation
- Internal communication platforms
- External communication management
- Best practices
- Community events
- Community-level governance
- Impact and reporting
- Engaging non-specialist users

Engagement

- Stakeholder mapping & engagement
- Onboarding
- Roadmap for engagement
- Knowledge and skill workshop
- Integrate feedback in strategy
- Mentoring and upskilling members
- Aligning with EDIA principles
- Recognition and visibility
- Onboarding diverse community leaders
- Community events
- Open collaboration
- Community survey and reporting
- Reproducibility and knowledge sharing

Strategic Development

- Horizon scanning, Identify opportunities
- Vision and priorities (w/ Leadership)
- Ways of working
- Implement policies (W/ RPM)
- Community assessment
- Community/project collaboration
- Community advocacy
- Incentive and rewards (w/ Leadership)
- Identify growth opportunity
- Promote/demo open leadership
- Sustainability plans (w/ Leadership)
- Strategic partnerships (w/ Leadership)
- Sust

Accountability

- Awareness of timeline, budget, risks
- Share community plans
- Team and community meetings
- Task prioritisation
- Build/follow internal process
- Ethics documentation (w/ researchers)
- Event logistics (event teams)
- Budget planning (accounting)
- Project meetings (w/ RPM)
- Stakeholder engagement (w/ RPM)
- Legal requirements (w/ RPM)
- Internal project reporting (w/ RPM)

Technical Expertise

- License types, version control
- Infrastructure, technical skills
- open science strategy
- Data practice (w/ Data Wranglers)
- Technical training (w/ Skills team)
- Supporting code(w/ RSE/RDS)
- Maintaining code (w/ RSE/RDS)
- Data analysis (w/ RSE/RDS)

- Product management (w/ RAM)
- Technical Support (w/ RSE/RDS)
- Web/UI/UX design (w/ UX specialist)
- Reproducible workflows
- Data management (w/ Data Stewards)

SKILLS AND RESPONSIBILITIES

RCMs have varied career paths!

Where can you draw from the community?

Where can you collaborate and develop?

Communications
Make it attractive

Engagement
Make it accessible

Accountability
Project Management

Strategic Development

Technical Expertise
Demonstrate best practice

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

SKILLS AND RESPONSIBILITIES

- What skills and resources do you have?
- What skills and resources does your community have?
- Who / what infrastructure from outside the project can be brought in to fill the gaps?
- What upskilling or resource development is needed within your community?

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

Part 1: What is RCM?

Part 2: Skills for RCM

Part 3: Community maturation

Part 4: Managing your community

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

PURPOSE DEFINES PARTICIPATION

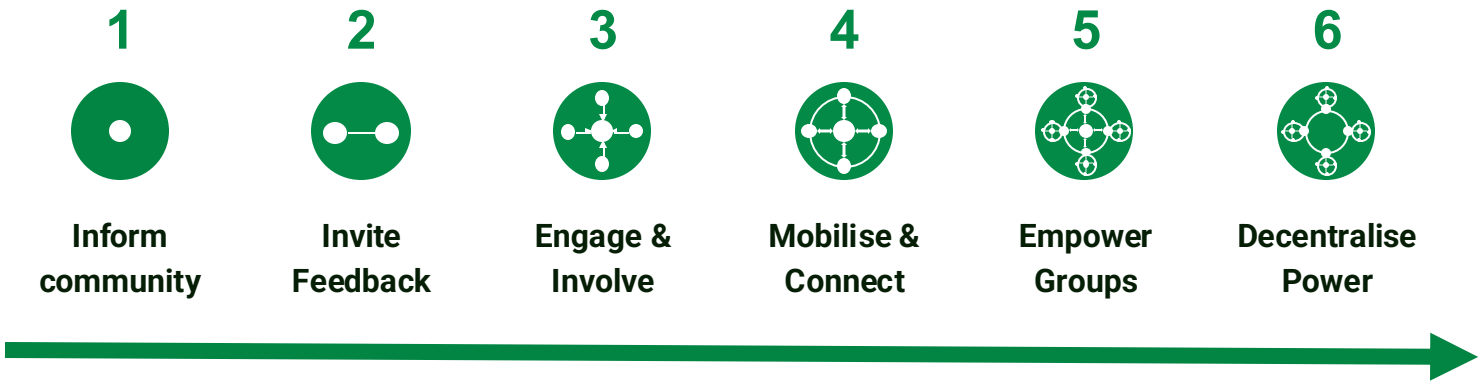

Every community should have a purpose (mission/vision)

- Purpose defines how you would like community members to interact with you and each other = “Participation”
- Interactions between community members will happen whether you intend for them or not
- The RCMs role is to scaffold, facilitate and empower for the desired level of participation

Communities with more complex participation can do more!

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

LEVELS OF PARTICIPATION

- Complexity of potential problems solved increases
- Scope and rate of problem solving increases
- Sustainability and diversity of perspectives increase
- Infrastructure and required resourcing increases!
- Can be used to stage objectives (e.g. Y1, Y2, Y5)

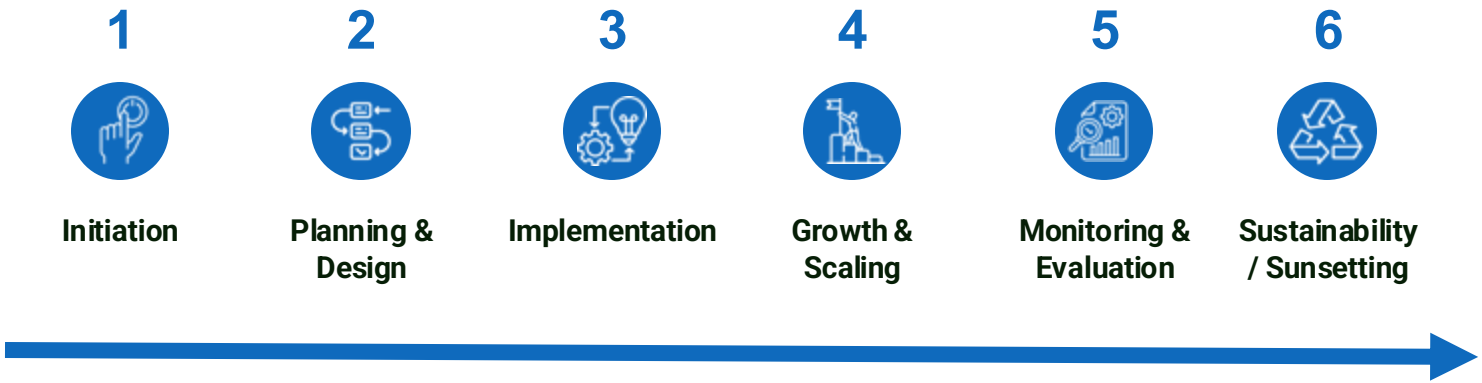

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

LEVELS OF PARTICIPATION

- Inform: The community is a communications channel
- Invite feedback: The community shares opinions with you
- Engage & Involve: Leaders connect to collaborate, share practices and combine solutions
- Mobilise & Connect: Different groups within the community are interconnected
- Empower groups: Groups undertake activities aligned with the community purpose
- Decentralise power: Shared decision making and distribution of responsibilities

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

STAAGES OF COMMUNITY BUILDING

- Targeted activities appropriate for the desired level of participation
- Consider monitoring and evaluation measures when designing community objectives
- Be reflexive throughout - how will you know when you are ready to move to the next stage?

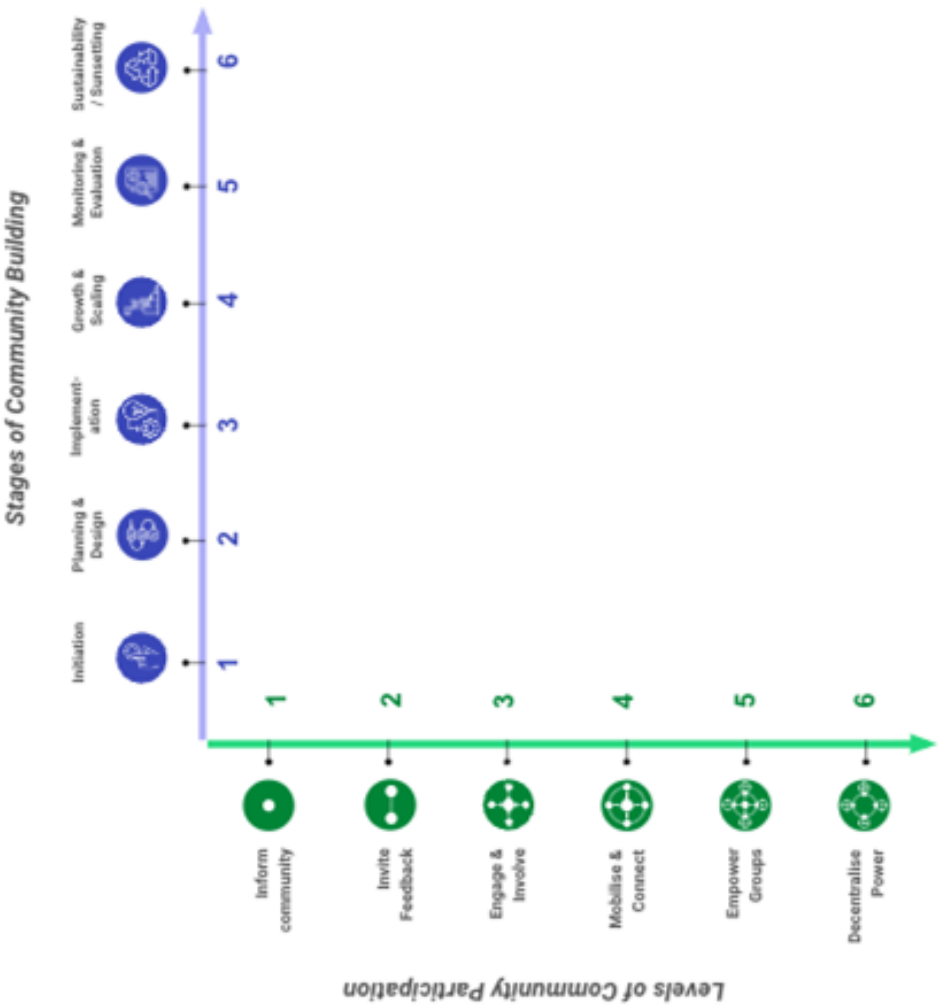

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

STAGES OF COMMUNITY BUILDING

- Initiation: Share information and communicate project goals
- Planning & Design: Build stakeholder awareness plans and prioritise specific objectives
- Implementation: Provide collaborative opportunities for specific stakeholders
- Growth & Scaling: Facilitate knowledge exchange and skill building
- Monitoring & Evaluation: Assesses success and refine strategy
- Sustainability / Sunsetting: Review sustainability, close or future iterations

WRAP UP

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

WRAP UP

1. **What RCM is**: Formal activities to facilitate collaborative problem solving (also, vibes and visibility 😉)
2. **What skills are needed**: A diverse role! Communication, engagement, strategic development, technical research expertise, significant accountability
3. **What can be achieved in a community**: Complex participation requires resourcing, but can solve more complex problems
4. **Think strategically about your community**: Your power is in what you know about people, and how you plan to work with them

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

THIS SESSION (45 min - all)

Across all lists:

- Shortlist to 2 principles
  - Which principles should be generalisable to all ADR UK communities?
  - Which are not already captured in the mission of ADR UK?
    - "enabling vital research that has the potential to lead to better informed policy decisions and more effective public services"
  - Can we collapse across or integrate any principles?
- Any updates following RCM101 materials?
- Get explicit about what each shortlisted principle *means*

RCM Cooperative | 10.5281/zenodo.15778698 | CC-BY-4.0

OPERATIONALISE (60 min - groups)

For both shortlisted principles:

- What specific actions can communities can take to achieve/demonstrate this principle?
- What resources (including training) will communities require to deliver these actions?
- Who will be accountable for delivery of these actions?
- How will this principle be communicated?
- How will we know when communities are successfully delivering on this principle?
- Does delivery require changes to existing workflows, policies, or organisational structures?
- What are the biggest risks to failure?
- How can these risks be mitigated?

This is co-creation with ADR UK, not a list of demands

YOUR NEXT STEPS (20 min + 25 min)

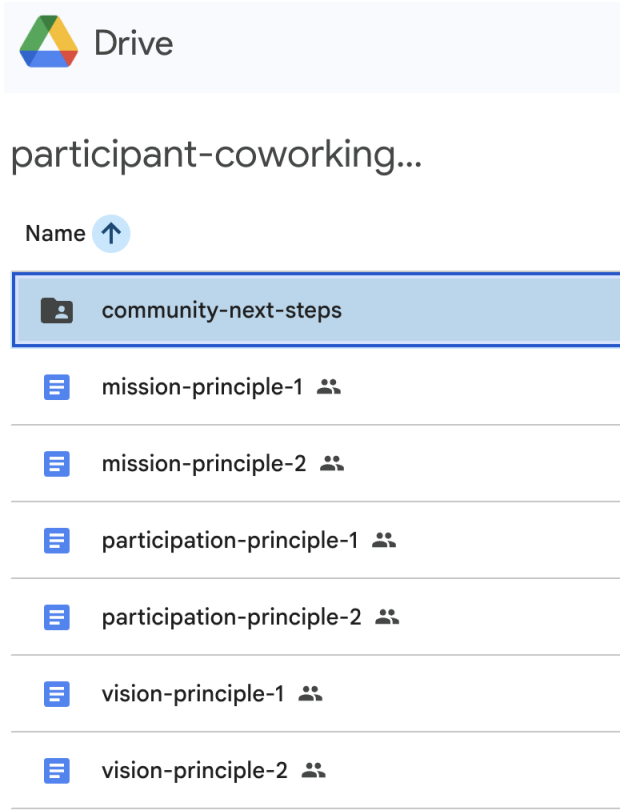

Applying it to your communities

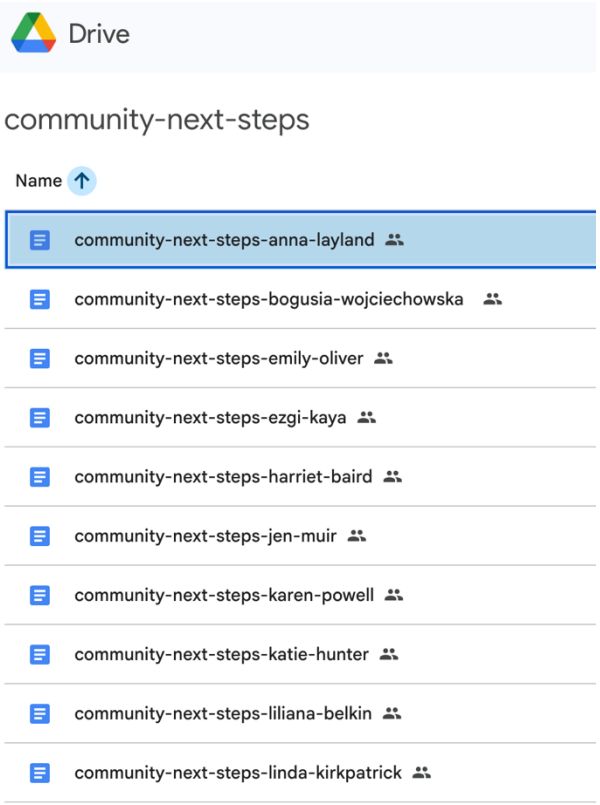

- Key take-homes from these workshops
- Goals for September, December, March 2026
- Prompts for thinking about delivery
    - What resources (including training) will you require to deliver each goal?
    - Who will be accountable for delivery?
    - How will I communicate this goal?
    - How will I know when I've been successful?
    - Does delivery require changes to existing workflows, policies, or organisational structures?
    - What are the biggest risks to failure?
    - How can these risks be mitigated?

This is really important understanding for ADR UK
